- a) A member of the public expressed concern that the minutes of the last meeting and the one before had only been published as DRAFT and were yet to be posted to the website. The Chair assured the meeting that the meetings had been approved but that due to the absence of a permanent clerk the process of final publication had been delayed.
- b) District Cllr Davis represented several members of the public had attended to highlight the fact that they would like to volunteer to help with minor works to clear silt and make repairs around the village following the flooding.
Cllr Davis said she had written an email to the Council asking them to begin the process of training volunteers. The Chair expressed concern that the email had not been received although Cllr Davis reported she had sent it on 29th November, so no action had been taken to date. It was agreed that this matter would be included on the next agenda in January.
Dates would need to be agreed with the Environment Agency and County Council for the training requested.
- c) A member of the public highlighted the issue of the wider catchment area, if Debenham clears silt, and the water flows away, where does it go? Does it cause further issues downstream? This will need investigating with relevant authorities.
- d) A member of the public wanted to correct a minute from the last meeting, DPC/24/169: St Mary's Churchyard, where it stated a donation would be made to the Church. He stated that no donation had been made following the clearance of the logs.
The Chair made it clear that the minutes were correct, given the information available at the time, but that the Council would investigate the events and clarify what had occurred.

- a) County Cllr Hicks was delayed, he arrived later and addressed the meeting. His report had been sent prior to the meeting but he wished to summarise his report.

- j) Report on donation of wooden bench — Priory Lane: The bench, donated by a member of the public marks the high point of the 2024 flooding in the village. The bench will need to be secured and added to the asset register and included on any maintenance schedule and H&S checks.
